DETAILED ACTION

The examiner acknowledges the submission of the amendment filed on 07/16/02.

At this time claims 1, 5, 6, 10, 11, 12 are amended. Claims 2, 8 and 13 are canceled.

Thus, claims 1,3-7, 9-12,14 and 15 are pending in the instant application.

The submitted amendment considered non-responsive since it does not address several issues raised in the first Office Action. Deficiencies in the drawings and specification, and the claims rejection under 35 U.S.C. 112, second paragraph have not been corrected and/or discussed in the Remarks.

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they are incomplete; Fig. 1 does not have any reference signs, Fig. 4A, 4b have pointing arrows without reference numbers, Fig. 4c does not clearly indicate the thermal spreader 412. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "310" has been used to designate both vents and fan. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description:

- Art Unit: 2835

304, 306, 308 and 408. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

4. The disclosure is objected to because of the following informalities: the reference numerical character 310 assigned to the unit and to the vents on Page 4.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. Claims 1, 3-7, 9-12, 14 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is vague and indefinite because the first and second apertures and the thermal spreader have not being clearly defined in the specification or in the claim.

Claims 3, 4 and 7 are vague and indefinite because they include the functional recitations, which are not supported by recitation in the claims of sufficient structure that is being affected by the function or to accomplish the function and therefore lacking further limitation to the claims.

Claims 6 and 11 are vague and indefinite because the thermal spreader has not been clearly defined in the specification and in the drawings.

Claims 5, 9-10 and 12, 14, 15 are inherently vague and indefinite since they depend on claims 1, 6 and 11 respectively.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 1, 3-7, 9-12, 14, 15 are rejected under 35 U.S.C. 102(a) as being anticipated by Bhatia, Pat. 6,094,347.

Bhatia discloses the apparatus for docking a computer system comprising a first aperture to dock the computer system, a second aperture 215 to align with an aperture in the computer system 145, which exposes a thermal spreader 130, a convective unit 210, 220 removes internal air for cooling. The method steps of claims 11, 12, 14 and 15 are necessitated by the device structure as disclosed by Bhatia.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

- Art Unit: 2835

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
